$$\phi = \sin^{-1}\left(\frac{Z}{r}\right)$$

TCC

- Origin at a point Q
- Q may be defined with GCC, GGC or GSC

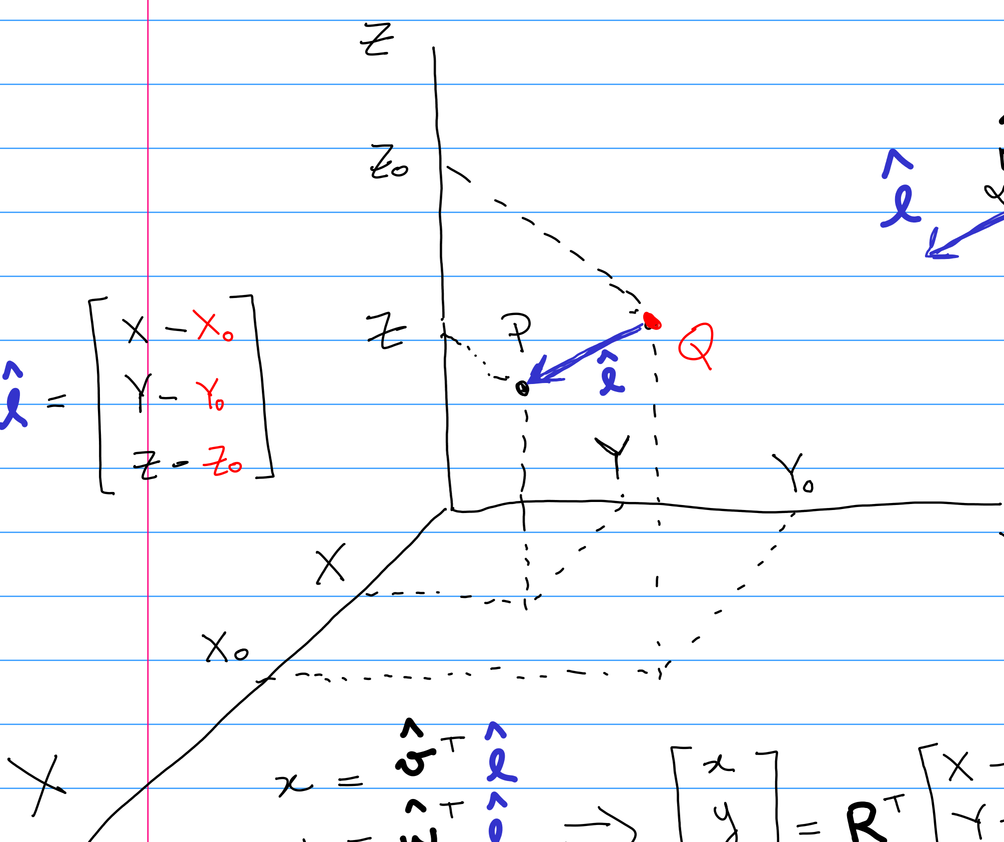
Consider two points defined with GCC

$Q = (X_0, Y_0, Z_0)$ $\quad P = (X, Y, Z)$

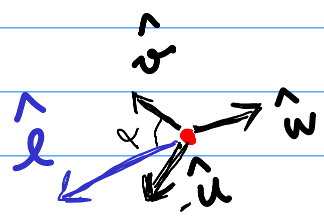
$\hat{v} = \hat{\varphi}$ or $\hat{\Phi}$

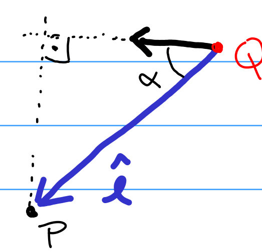
$\hat{w} = \hat{\lambda}$

$\hat{u} = \hat{h}$ or $\hat{r}$



$$\hat{l} = \begin{bmatrix} X - X_0 \\ Y - Y_0 \\ Z - Z_0 \end{bmatrix}$$





$$\underline{\|\hat{v}^T \hat{l}\|}$$

$$x = \hat{v}^T \hat{l}$$
$$y = \hat{w}^T \hat{l}$$
$$z = -\hat{u}^T \hat{l}$$

$$\Rightarrow \begin{bmatrix} x \\ y \\ z \end{bmatrix} = \mathbf{R}^T \begin{bmatrix} X - X_0 \\ Y - Y_0 \\ Z - Z_0 \end{bmatrix}$$

$\mathbf{R}^T = \mathbf{R}^{-1}$ ok?

$$\begin{bmatrix} X \\ Y \\ Z \end{bmatrix} = \begin{bmatrix} X_0 \\ Y_0 \\ Z_0 \end{bmatrix} + \mathbf{R} \begin{bmatrix} x \\ y \\ z \end{bmatrix}$$
